

Our Lives as Women in Physical Sciences II

Date: Wednesday, April 16
Time: 4:00 – 5:30 pm
Location: 2201 Nat Sci II

The UCI ADVANCE Program cordially invites all graduate students and postdoctoral fellows to an informal forum for discussing issues that affect women who are pursuing careers in the physical sciences, including gender issues in science and academia, balancing the demands of research and personal life, etc. Moderating the discussion will be a panel of four women faculty: Drs. Barbara Finlayson-Pitts (Chemistry), Kathleen Johnson (ESS), Natalia Komarova (Math) and Tammy Smecker-Hane (Physics & Astronomy). The first forum was held in 2005, and a summary of the topics discussed at that event can be found at <http://www.physsci.uci.edu/OLWPS1.html>. Light refreshments will be provided.
